- 3:40-4:40 pm – **Functional movement disorders** (Espay)
- 4:40 pm – Closing Remarks (Kompoliti)

Additional In-Person Opportunities

- Networking opportunities
- Hands-On Experience
- Immersive Environment
- Focused Learning Environment
- Professional Growth
- Become a Thought Leader

Networking Opportunities

Our in-person events provide excellent opportunities for networking and building professional relationships. You can interact with speakers, fellow attendees, and experts in the field, fostering connections that may not be as easily established in a virtual setting.

Hands-On Experience

Our educational programs include practical demonstrations that are better experienced in person. This can enhance your learning and skill development, especially in a medical and clinical setting.

Immersive Environment

Being physically present in our educational setting allows for a more immersive experience. You can engage with the environment, ask questions, and fully participate in activities, creating a more impactful learning experience.

Focused Learning Environment

Our in-person events provide a dedicated and focused environment for learning. Away from potential distractions, you can concentrate on the educational content without the interruptions that can occur in a virtual setting.

Professional Growth

Attending in-person allows you to experience the culture of the location, which can be enriching and may offer additional opportunities for professional growth.

Become a Thought Leader

Along with expert faculty and local thought leaders, you will interact with those at the forefront of movement disorder innovation, technology, education and research. As you grow and learn with us, so will opportunities in leading and improving patient care in movement disorders.

CONTINUING MEDICAL EDUCATION AND NETWORKING OPPORTUNITY

LEARNING OBJECTIVES

- Describe the clinical presentation and phenomenology associated with Parkinson's Disease (PD) and other movement disorders.
- Discuss the diagnostic approaches and tools available for PD and other movement disorders.
- Identify and manage motor complications in PD such as motor fluctuations and dyskinesia.
- List the relevant treatment options for PD and other movement disorders.
- Evaluate surgical options and procedures available for PD and other movement disorders.
- Discuss Deep Brain Stimulation (DBS), indications, contraindications, risks and benefits.
- Evaluate the management of patients after DBS surgery.
- Identify movement disorders that can be treated with botulinum toxin injections.
- Describe the clinical presentation and phenomenology of tardive dyskinesia and other hyperkinetic movement disorders such as Huntington's disease.
- Discuss the treatment options to manage tardive dyskinesia and other hyperkinetic movement disorders.
- Identify and management of non-motor features of PD and other movement disorders.
